

## DOOR AIR HEATERS

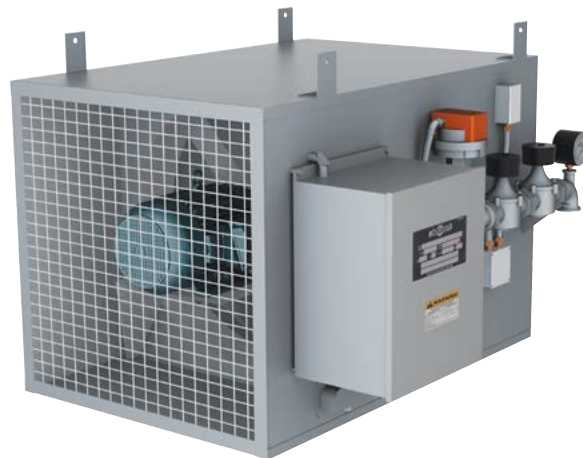

### Interior Installations

### Exterior Installation

### Help Keep Work Areas Warm During The Cold Season.

With fall and winter quickly approaching, now is the time to start getting ready for the cold season. Help your customers keep their work areas warm with Aerovent's line of door air heaters. These units operate on natural gas and come completely assembled from the factory for easy installation. Unlike typical air curtains or slotted unit heaters, Aerovent's door air heaters can deliver high velocity airflow to break through a "river" of cold air when a dock door is opened. Fresh air must be present during operation. Consult Aerovent for general space heating and make-up air needs.

#### Features

- Fully factory tested, assembled and ready for easy installation
- Rugged cast aluminum airfoil blade propeller
- 3/4 & 2 HP Models available for 325,000 to 990,000 BTU range
- Stainless steel burner provides long lasting durability
- Built with NEMA 12 control enclosure with UL 508 certification

#### Options

- Bolted, galvanized housing or fully welded with industrial enamel coating construction
- Standard, FM or IRI/FM gas piping configurations
- Non-fused disconnect switch
- Directional discharge grille
- Ultra violet flame sensor for moisture prevalent application
- Consult factory or see the Aerovent's door air heater Catalog 896 for additional options and information
