

Farr Gold Series collectors feature a modular design for optimum field flexibility. Each module accommodates airflows up to 4,000 cfm using four cartridges mounted in a symmetrical frame. Additional modules may be added to meet total airflow requirements of 100,000 cfm and beyond.

## WHY WE DO IT CLEAN AIR MATTERS

- Confused about your dust collector proposals?
- Trouble deciding who's offering apples and who's offering oranges?
- What are the real differences in the construction of the unit?
- Are there really differences in the quality of the filter elements?
- Which manufacturers have real control over product quality?
- Who stands behind their work?

These are a few of the questions that should be answered when making a dust collector purchase. We have made it simple to compare the Farr Gold Series with the rest of the field with this simple Dust Collector Comparison Sheet. We encourage you to put us to the test and understand why the Farr Gold Series dust collector is the best in the business. When you have a better dust collector, you're willing to compare.
